

Clinic Intake Check list

Use this one-page reference during room setup and patient intake review.

A faithful conversion should preserve title formatting, dot bullets, numbered steps, table structure, and the figure caption.

Supplies

- .. Confirm patient identity.
- .. Prepare the sterile tray.
- .. Label the specimen bag.

Procedure

3. Document the intake summary.
1. Wash hands before gloves.
2. Put on sterile gloves.

The step order is broken and the formatting is inconsistent with the intended layout.

Reference Figure and Status Table

Figure 1. The red square sits next to Step 3.

The caption is detached from the image and points to the wrong step.

Status table

Tray ready - Nurse - Done
Bag labeled - Assistant - Pending
Consent filed - Admin - Done

The original table structure is flattened into plain lines here.
